👤 SUMMARY

IT Engineer with hands-on experience in enterprise systems, cybersecurity, and software development. Currently deployed at King Fahd University of Petroleum & Minerals (KFUPM) under ALTAMIMI ENGINEERING CONSULTING COMPANY, leading development of a digital contractor material exit permit system with QR code verification — a high-priority governance initiative. Skilled in SAP S/4HANA, SAP SAC, secure web development, and penetration testing. Proficient in cloud security (AWS), Linux administration, and digital forensics. Actively pursuing advanced security certifications and continuously developing expertise in enterprise systems and security assessment.

🎓 EDUCATION

Umm Al-Qura University — Bachelors (3.08/4)
JUNE 2024

🏢 EXPERIENCE

KFUPM — IT Engineer

JANUARY 2026 - PRESENT

- Deployed at King Fahd University of Petroleum & Minerals (KFUPM) as part of an IT outsourcing engagement.
- Designed and leading development of a University Contractor Material Exit Permit System — a full-stack digital governance platform with QR code verification, multi-level approval workflows, and automated audit trails.
- Conducted business analysis and requirement gathering with project department stakeholders to map current manual processes and define system specifications.
- Architected a 3-layer solution: Contractor Portal, Department Approval Dashboard, and Security Gate Interface — deployed on-premise to meet university governance and compliance requirements.
- Implemented one-time QR code generation with automatic permit deactivation and full traceability, eliminating forged

🏆 CERTIFICATIONS

- **Saudi Council of Engineers Membership.**
- **CompTIA Security+ — Course Completion.**
- **eJPT — Course Completion.**
- **CCNA — Course Completion.**

approvals and duplicate permit abuse.

SABIC — IT Intern

JUNE 2023 - AUGUST 2023

- Gained hands-on exposure to SAP enterprise systems deployed across one of Saudi Arabia's largest petrochemical organizations.
- Assisted in data analysis and report preparation for IT department projects.
- Participated in IT systems development and improvement initiatives.

 PROJECTS

Material Exit Permit System — QR Code Verification(KFUPM) 3 MONTHS

Designed and currently developing a full-stack digital governance platform for KFUPM that replaces paper-based contractor exit permits with a secure, QR-authenticated workflow. Features multi-level approval dashboard, automatic digital stamping, one-time QR validation at security gates, and a complete audit trail.

SurgiPro — Surgical Room Booking System (Graduation Project) 2 MONTHS

Collaborated in a team of five to build a surgical room booking system (PHP, MySQL, JavaScript, HTML/CSS, Bootstrap) addressing a hospital scheduling issue. Contributed to both front-end and back-end development, as well as system planning and secure booking features.

CTF Competitions (2025 – Present).

Active CTF player on HackTheBox and TryHackMe. Focused on web exploitation, network analysis, and forensics challenges to continuously sharpen offensive security skills.
